CSE 2200

Advanced Programming

*Lab test on JSON Parsing   **Set B**

Time: 1 hour 40 minutes   **Marks: 15**

1. Access and parse the **JSON** data of 3 Bangladeshi Telecom companies from the following link:
   https://api.myjson.online/v1/records/53b4282e-3ea7-4c05-b9b2-b9825c0c91f0

2. Create 3 **Pages** in your app in following order
   (Company -> **Unmarried People** -> **Hobbies**)

   3

   - There will be a **list** in the first page showing the names of the companies.

   7

   - If you click on any particular company name, it will show the **list of unmarried** people working for the company given as input.

   5

   - If you click a particular name of the list, it will show his individual **hobbies** within a single textview object.
